

IT'S TIME TO CHOOSE **YOU.**
SMILE YOUR BEST **SMILE.**

FIRST FIT™

guided prosthetics delivery system

It's time to choose **you.**

Transform your smile in as little as two hours

FirstFit Veneers are recognized as the most innovative dental procedure available today. This digital technology enables patients to receive a brand-new smile in as little as two hours.

What are veneers?

Veneers are minimally invasive cosmetic shells that are typically constructed of a high strength all-ceramic material and bonded to the front of your existing teeth. If you are uncomfortable with your smile or feel your teeth could use an enhancement, FirstFit all-ceramic veneers are a fast, affordable, and predictable solution that will enable you to **smile your best smile.**

FirstFit Veneers will improve any of the following characteristics of your teeth:

Color — Will correct existing tooth stains caused by foods, drinks, smoking, medication, or even normal aging. Veneers are available in numerous shades, from the most natural to the brightest Hollywood white. FirstFit Veneers are resistant to staining, eliminating any future staining or bleaching concerns.

Size & Shape — Veneers are good for teeth that are worn down from grinding habits or may not have the shape or size you want to begin with. They can be shaped and sized to create the most flattering smile.

Alignment & Spacing — Veneers can close small gaps between teeth or make slight corrections in alignment.

Why Choose FirstFit for Your Veneer Procedure?

- ✓ By using the latest digital technology and smile design software, your teeth will be prepared through guides that allow a minimally invasive preparation to preserve more of your healthy tooth structure.
- ✓ By minimizing the preparation drilling, you no longer have to worry about pain and anxiety while in the dental chair. FirstFit technology dramatically reduces visits and chairtime.
- ✓ FirstFit completely removes the need for you to wear uncomfortable and in many cases, unsightly temporary veneers and enables your dentist to give you the smile of your dreams in a single visit.
- ✓ The custom made, all-ceramic veneers are produced using CAD/CAM technology that ensures quality, fit, function, and impeccable esthetics that meet every patient's expectations.

It's finally time to start taking control of your smile. Ask your dentist about getting started with the FirstFit Guided Veneers Delivery System so you can transform your confidence today.

What a wonderful experience FirstFit was. The procedure was fast and painless. I was in and out of the chair in less than an hour and I don't have a bad side anymore with my missing space. I have my smile back!
